

Town of Belmont
Department of Public Works
Space Needs Room Part Plans

Summary

The attached Room Part Plans were prepared to illustrate the space needs requirements of the Belmont Department of Public Works. These part plans are working drawings and as a result contain correction notes which illustrate the changes that were made during the programming phase of the project. All revisions to the original part plans have been designated by the number 1. The corrections have not been incorporated into updated part plans to allow the reader to track the changes that were made by the Town and Gannett Fleming during the space needs process.
